EXPERIENCE

Frontend developer intern, Egypt— *Subsbase*

August 2023 - September 2023

Worked on SubsBase's innovative subscription management system, specifically the notification-center using VUE, Axios API and Socket.io.

Fullstack developer, Egypt— *Freelancing*

March 2023 - PRESENT

I've been working as a freelancer on multiple projects for the past year such as a full business ERP system using react, MUI and mysql. As well as a shipping company system, website and application using react, react native, MUI, and mysql.

Celeste, Egypt— *Business Owner (design, marketing and operations)*

October 2021 - PRESENT

I manage my own small-business by myself alongside my studies. I take care of designing and making jewelry, social media, marketing, events, finance, PR, and much more.

Graphic Designer, Egypt— *Freelancing*

February 2023 - PRESENT

As an artist, I've managed to create a side hustle out of my unique and creative designs and work on a few freelancing projects.

IGCSE, Egypt— *Teaching Assistant*

October 2019 - February 2020

I had the honor of working with Dr Loay Khalil as a teacher assistant for an IGCSE session.

PROJECTS

Shipping system — website & application

Using react-next and tailwind i worked on a website & application which include all shipping operations.

APEX banking— *Website for online banking*

Using react-bootstrap, my team & I managed to create a fully functional online banking website with multiple interfaces: for clients, bankers & admins, where all banking operations are available to the user.

Marvelous Wars — *2-player marvel themed board game*

Using Java, me and my teammate have successfully created a Marvel themed board game with its GUI.

VHDL Dispenser — *A hardware that dispenses amount specified by the user*

Using VHDL, I've managed to create a dispenser that dispenses the number of content demanded when the sensor detects a hand.

Travel website — *Website for destination details*

Using Node js, Express js and MongoDB I have worked on a travel website where registered users can view multiple vacation destinations, add them to their lists and much more.

Online Game websites— multiple online games

Using html, css, bootstrap and javascript I have worked on multiple online games such as a number guessing game, and a two player dice game both with calculated scores.

EDUCATION
